

## HOW TO BECOME AN INVESTOR AT XEROMARKETS.

- 1- You may open new Mt4 at XeroMarkets dashboard <https://secure.xeromarkets.com/>
- 2- Go to the Social Trading Website at <https://copytrade.xeromarkets.com/portal/registration/subscription>
- 3- Fill in all the required details.

- 4- You need to set up your subscription configuration.

### i) Filters for copying deals.

#### You can Choose the Direction for trades.

- All = All the position (Buy & Sell) from the provider will be copied.
- Buy = Only the Buy position from the provider will be copied.
- Sell = Only the Sell position from the provider will be copied.

**Minimum/Maximum Lot.**

### Filters

Filters for copying deals

Direction \*  
All ▼

Provider deals of only specified direction will be copied

Minimum lots

Provider deals with volumes lower than the specified will not be copied

Maximum lots

Provider deals with volumes equal or higher than the specified will not be copied

There are 4 types of Volume Scaling that you can choose from:

- 1- Autoscale** – Volume of copies are scaled proportionally to the ratio of the sizes of Provider’s and Follower’s trading account. The sizes are determined by an additional parameter which is compared value. It can be scaled to either Balance or Equity.

Calculation formula:

$$\text{Copied volume} = \left( \frac{\text{Compared value}_{\text{Provider}}}{\text{Compared value}_{\text{Follower}}} \right) * \text{Risk ratio}$$

- 2- Multiply** - Follower copies the volume their Provider has opened and multiplies it by a predefined value. The Multiply Volume scaling has an additional option called Risk ratio which multiplies the target volume by the specified number.

Calculation formula:

$$\text{Copied volume} = \text{Volume}_{\text{Provider}} * \text{Risk ratio}$$

According to the formula, to copy exactly the same volumes as the Provider, the Follower needs to set the Risk ratio to 1.

- 3- Fixed** - Volumes of copies are fixed.

When Provider opens a trade of any volume, it is copied to the Follower’s Account with the predefined volume (specified in the corresponding additional parameter).

**4- Lots Proportion** - Volumes of copies depend on the Follower account's current Balance or Equity.

This type is somewhat similar to the Fixed in a sense that it allows a Follower to adjust the risk of copying from their side, not depending on the Provider Trading account's financial conditions or the source trade's parameters. Lots Proportion has additional parameters: Compared Value (Balance or Equity), Risk ratio and Lots step.

Calculation formula:

$$\text{Copied volume} = \text{Risk ratio} * \text{int}(\text{Compared value}_{\text{Follower}} / \text{Lots step})$$

Please note that the division returns an integer result rounded to the lesser number (To Zero rounding method). In other words, the formula calculates how many full Lots steps are in the Compared Value of the account, multiplies the result by Risk ratio and opens a copy with the corresponding volume.

**To better understand the volume scaling in work, see the examples below.**

Examples

### **Autoscale sharing case**

**Subscription Strategy settings:**

- Sharing Type: **Autoscale**

- Compared value: Balance

- Risk ratio: 1

- Follower's balance: 500 USD

- Provider's balance: 1000 USD

Provider opens trade: buy 1 lot EURUSD

Follower copies the trade as: buy 0.5 lot EURUSD

### **Fixed sharing case**

#### **Subscription Strategy settings:**

- Sharing Type: **Fixed**
  - Fixed volume: 0.20
- Follower's balance: 500 USD  
-Provider's balance: 1000 USD
- Provider opens trade: buy 1 lot EURUSD  
Follower copies the trade as: buy 0.20 lot EURUSD

### **Multiply sharing case**

#### **Subscription Strategy settings:**

- Sharing Type: **Multiply**
  - Multiplier: 0.50
- Follower's balance: 1000 USD  
- Provider's balance: 1000 USD
- Provider opens trade: buy 0.50 lot EURUSD  
Follower copies the trade as: buy 0.25 lot EURUSD Lots

### **Proportion sharing case**

#### **Subscription Strategy settings:**

- Sharing Type: Lots Proportion
  - Compared Value: Balance
  - Risk ratio: 0.01
  - Lots step: 1000
- Follower's balance: 223 000 USD
- Provider opens trade: buy 1 lot EURUSD  
Follower copies the trade as: buy 2.23 lot EURUSD

**iii) Risk Management.**

## Risk Management

Setting up the subscription's acceptable risks

Total loss level
\$

The aggregated realized loss of all copied trades since joining the provider. When reached, triggers 'Unsubscribe'.

Floating loss level
\$

Acceptable level of aggregated floating loss of copied trades. When reached, the specified action is taken.

Total profit
\$

The aggregated realized profit of all copied trades since joining the provider. When reached, triggers 'Unsubscribe'.

Floating loss level action \*

Close all
▼

Actions in case the specified floating loss level is reached.  
Close all: close all the subscription's copied trades.  
Close unprofitable: close copies with PnL < 0 one by one till their common floating loss level gets lower than the specified one.  
Close all unprofitable: close all copies with PnL < 0.
